Assassins Technical Rider Visual Kitchen

Material to be provided by promotor

- Projection Material:

1 x 6X4 projection screen (preferably retro projection)
projector should be at least 4000 ansilumen, (6000 is better, 10000 is too much)

Please provide the necessary signal enhancers and/or hum-eliminators according to your venue! On the other hand: don't install too much gear as it will affect the audio/video synchronization, often creates noise and most of the time it's redundant anyway. A direct BNC/RCA/S-Video link to the projector and the optional hum-eliminator will do the trick in most cases. If help is needed don't hesitate to call (mobile: +32 495 325 421) or mail: info@visualkitchen.org

- Video Equipment:

1x Panasonic MX50 in good condition

Cabling:

4 BNC cables from stage to video mixing booth (3+1 spare)

minimum 8 short BNC/RCA/S-Video cables

minimum 4 powersockets (chuco 220V/16A)

- Audio Equipment:

2x DI box

CD-player (pro-model)

cabling

Materials provided by Visual Kitchen

Video output: SD video (768x576) on BNC or S-Video

- 1x laptop
- 1x external HD
- 2x midcontrollers
- 1x audio interface (optional)
